Rubber-Dam Liquid

Light-cured rubber-dam liquid is dedicated for gingiva protection during dental treatments (whitening, etching, microabrasion, sandblasting etc.) and sealing rubberdam. Suitable for occlusal stamp technique.

CER1140 - 1x 1.2ml

£6.25

Rubber-Dam Cord

Rubber-dam cord is intended to stabilize dental dam in patient's oral cavity.

CER1160 - Thin
CER1165 - Medium
CER1170 - Thick

£8.50

ENDO-TOP Irrigation Needles

For rinsing of root canals and gingival pockets. Pack size 100.

CER1340

£8.95

Citric Acid 40%

The preparation is used during endodontic treatment for rinsing root canals. It improves mechanical cleaning of the root canal. It removes smear layer from the walls of root canal exposing the dentinal tubules. It allows for precise cleansing of dentinal tubules from pulp debris and precise sealant penetration.

CER1105 - 1x 400g

£9.95

CHLORAXID

CHLORAXID is intended to use during endodontic treatments as liquid for rinsing of root canals. Removal of dead pulp residues during mechanical preparation of the root canal. CHLORAXID pack contents: 1x 400g Bottle, 1x Adapter with Screw Cap & 1x Labelled Dispenser. Endo Pack pack contents: 20x 5ml Labelled Dispensers.

CER1095 - CHLORAXID 2%

£4.95

CER1175 - Endo Pack CHLORAXID 2%

£4.75

CER1100 - CHLORAXID 5.25%

£4.95

CER1180 - Endo Pack CHLORAXID 5.25%

£4.75

Calcipast

Calcipast is intended for use in dental treatment for temporary root canal filling. Additionally, Calcipast may be used for temporary filling of deep cavities during indirect or direct pulp capping. It has re-mineralizing effect on dental tissues thanks to its high content of calcium hydroxide. Radiopaque.

CER1070 - 1x 2.1g Syringe

£11.45

Endo-Prep Gel

Intended for chemo-mechanical root canal preparation.

CER1155 - 1x 5ml Syringe

£7.25

Eucalyptol

Eucalyptol is intended for use during repeated endodontic treatments to remove gutta-percha from the root canal.

CER1310 - 1x 10ml

£8.49

Orange Guttane

Orange Guttane is intended for use during endodontic re-treatment to remove gutta-percha from the root canal.

CER1200 - 1x 10ml

£13.50

Syntex Root Canal Filling & Sealant

The product is intended for dental treatment as a material for filling and sealing root canals.

CER1215 - 1x 10g Syringe

£36.95

Bio MTA+

The product is intended for dental treatment as a material for filling and remineralisation of root canals. When mixed with the BIO MTA+ liquid, the working life is ca. 4 min, and the compound sets completely in ca. 3 h. Mini Set contains 3x 0.14 g BIO MTA+ powder & 1x ml liquid.

CER1060 - Mini Set

£20.95

Essential NiTi Rotary Files

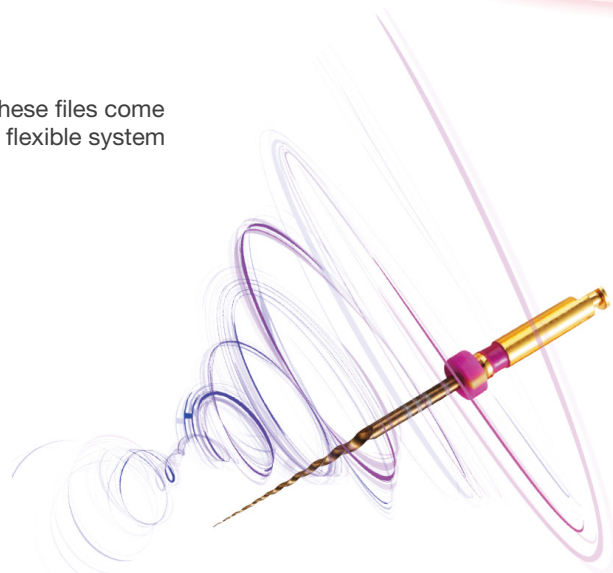

Essential NiTi Rotary files are made from the highest quality NiTi alloy these files come sterilized, ready for use. An efficient solution for practitioners seeking a flexible system that will smoothly navigate the majority of root canals. Pack size 6.

Excalibur®

EFFECTIVENESS AND VERSATILITY AT ITS BEST

A conservative, fast, and easy-to-use reciprocating system, ideal for any type of anatomy.

- **Gold treatment** - The second-generation Gold variant combines the cutting efficiency of the original Gold with improved flexibility and shape memory control.
- **Reduced taper** - Thanks to its 5% taper, it is the first single-file reciprocating system that is conservative, capable of removing less dentin than its competitors.
- **Reciprocant rotation** - The Excalibur system has a reciprocating rotary movement.
- **Large variety of apical calibers** - Different apical sizes. The family offers a variety of apical sizes, with four options ranging from 20 to 45. This range allows for precise adaptation to any type of dental anatomy.

£34.50

£25.50

Excalibur Glider®

EFFICIENT AND VERSATILE GLIDER

Improved cutting efficiency thanks to its cross-sectional area, decreased risk of fracture, and cyclic fatigue.

- **Gold treatment** - The second-generation Gold variant combines the cutting efficiency of the original Gold with improved flexibility and shape memory control.
- **Cross-Section** - Ensures higher cutting efficiency, resulting in reduced risk of fracture and cyclic fatigue, along with greater respect for the canal anatomy.
- **Reciprocant rotation** - The Excalibur Glider system has a reciprocating rotary movement.
- **Accessible and versatile** - This system has been designed for safe and easy use with any endodontic motor.
- Pack size 3.

D.T. Light-Post Illusion X-Ro

The D.T. Light-Post, is an advanced fiber post that adapts to the contours of the prepared canal rather than forcing the dentist to adapt the canal to fit the post. Each post has two separate apical tapers, based on scientific, anatomical measurements, and a parallel coronal section. In addition, the surface of the post is intentionally roughened to a highly micro-mechanical surface for excellent bonding and long-term.

RTD1590320 - Intro Kit RTD1590301 - Trial Kit

£169.95 **£44.50**

Macro-Lock Oval

The Macro-Lock OVAL Post, the advanced fiber post designed for maximum retention, with any type of cementation or resin build-up, is also available with RTD-patented Illusion and X-RO fiber technology. Each post size has a tapered (0.4) apical segment, and a profoundly flared coronal section.

Ivener Injectable Matrix System

INSERT. INJECT. DONE!

IVENEER injectable matrix system creates beautiful composite veneers with predictable shape and symmetry. It mimics natural dentition, and it is designed to create high-quality, natural-looking and anterior restorations in just one visit. These templates use innovative technologies that helped achieve a refined anatomically correct high-gloss restorations in a fraction of time then if done freehand. Results are both predictable and reproducible, making your anterior restorations faster and more cost effective.

Starter Kit includes 12x Small/Medium templates (3 of each: UR1, UR2, UL1 & UL2).
Intro Kit includes 64x Small/Medium templates & 64x Medium/Large templates.
Refills contain 10 templates.

In Surgery Implant Nurse Course

“Introduction to Implant Nursing including Draping & Gowning”

2 Hours CPD
GDC Outcomes A & C

NEW COURSE!
FREE for GID Members

Aim

To increase knowledge of the implant procedure, roles and responsibilities including gowning, set up and clean down

Objectives

- Be able to discuss the implant procedure including its benefits with patients.
- Confidently gown, set up and clean down for an implant procedure.

Agenda

- Implant Procedure Overview
- Drapes & Gowning
- Scrub (sterile) Nurse
- Circulatory (non-sterile) Nurse
- Clean Down
- Discussing Treatment Plans
- The Legal Aspects

Wright's Specialist Team

Our dedicated Specialist Surgical & Endodontic Team at Wrights brings with them a wealth of experience and knowledge in the dental industry. The 5 members of the Team cover the UK, to assist dental teams in everything surgical and endodontic including product demonstrations, bespoke drape kits and team training.

They also deliver our in surgery Dental Implant Nurse Training Course - just look at their experience!

- Collectively they have 153 years of experience in dentistry.
- All 5 have previously been qualified dental nurses.
- Between them they have previous practice roles of Practice Managers, Implant Nurses, Endodontic Nurses, Implant Co-ordinators, Group Managers, Dental Nurse Tutors.
- They have 2 PTTLS Qualifications, and all have experience in teaching and delivering courses.
- They have delivered presentations on Implant nursing, CQC Compliance, Infection Control
- There is also a Dental Nurse Examiner amongst them.
- Their passion and commitment to dentistry and customers is second to none.

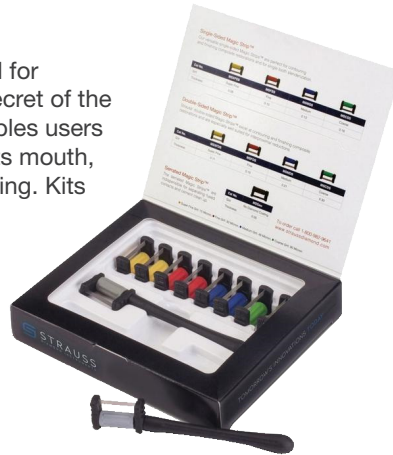

Ali, Andrea, Claire, Kirsty & Michelle are there to help you and look forward to meeting you!

Magic Strip System

Offers clinicians a precise and ergonomic tool for interproximal contouring and finishing. The secret of the magic strips is a high-quality handle that enables users to control the strip from outside of the patients mouth, eliminating the risk of finger injuries and marking. Kits contain 10x Strips and 2x Handles.

White Royale Premium Perfection+ Whitening Kit

The White Royale Premium Perfection+ Kit is the crown jewel within the White Royale assortment. It contains 3 whitening pens with 6% Hydrogen Peroxide Superior whitening gel and a Smart LED Mouthpiece.

The kit is very user friendly. Simply twist the bottom of the pen until a small drop of HPS whitening gel appears on the bristles and apply the gel directly onto the teeth. Then put the Smart LED Mouthpiece in your mouth and select the preferred LED mode to boost the 6% HPS whitening gel. This kit contains enough whitening gel for a complete whitening treatment. Due to the revolutionary HPS gel in the pens, the kit does not need to be stored refrigerated.
